

Utah State Division of Risk Management

2008 Self Inspection Survey

To All Of Our Valued Clients

- The Administration and Staff of the Utah State Division of Risk Management would like to guide you through the “2008 Self Inspection Survey” training and to thank you for your participation.

Purpose

- Claims histories have always given us guidance on liabilities that threaten your facilities. The inspections performed by our loss control specialists lend another set of eyes and ears to identify hazards and give recommendations to solve problems. But this survey will now establish trends from your own perspective.

Utilizing the Survey

- The manner in which you utilize this information is only limited by your imagination.
 - Clients are generating work orders from the data.
 - Others use data to help budget maintenance expenditures. Still others identify uses for their limited resources.
 - An honest and accurate survey will generate change, record the problems, and eliminate the most hazardous problems in order of priority.
 - The findings validate commonly known conditions, detail current needs and allow for open discussion to gain resolution.

What You Asked For

- More security with your surveys and data
- More control
- Access to data
- Better reports
- Lock and Unlock capability
- More concise questions
- Specific questions that were overlooked

Changes That Were Generated

- The questions are shorter for the surveyors but have a pop-up for further information.
- Coordinators have total control of their surveyors, reports, review and submit capability.
- Security has been increased with login and password required to access your organizations.
- Coordinators can edit and change any survey before it is submitted.
- Coordinators can create multiple reports from the data.

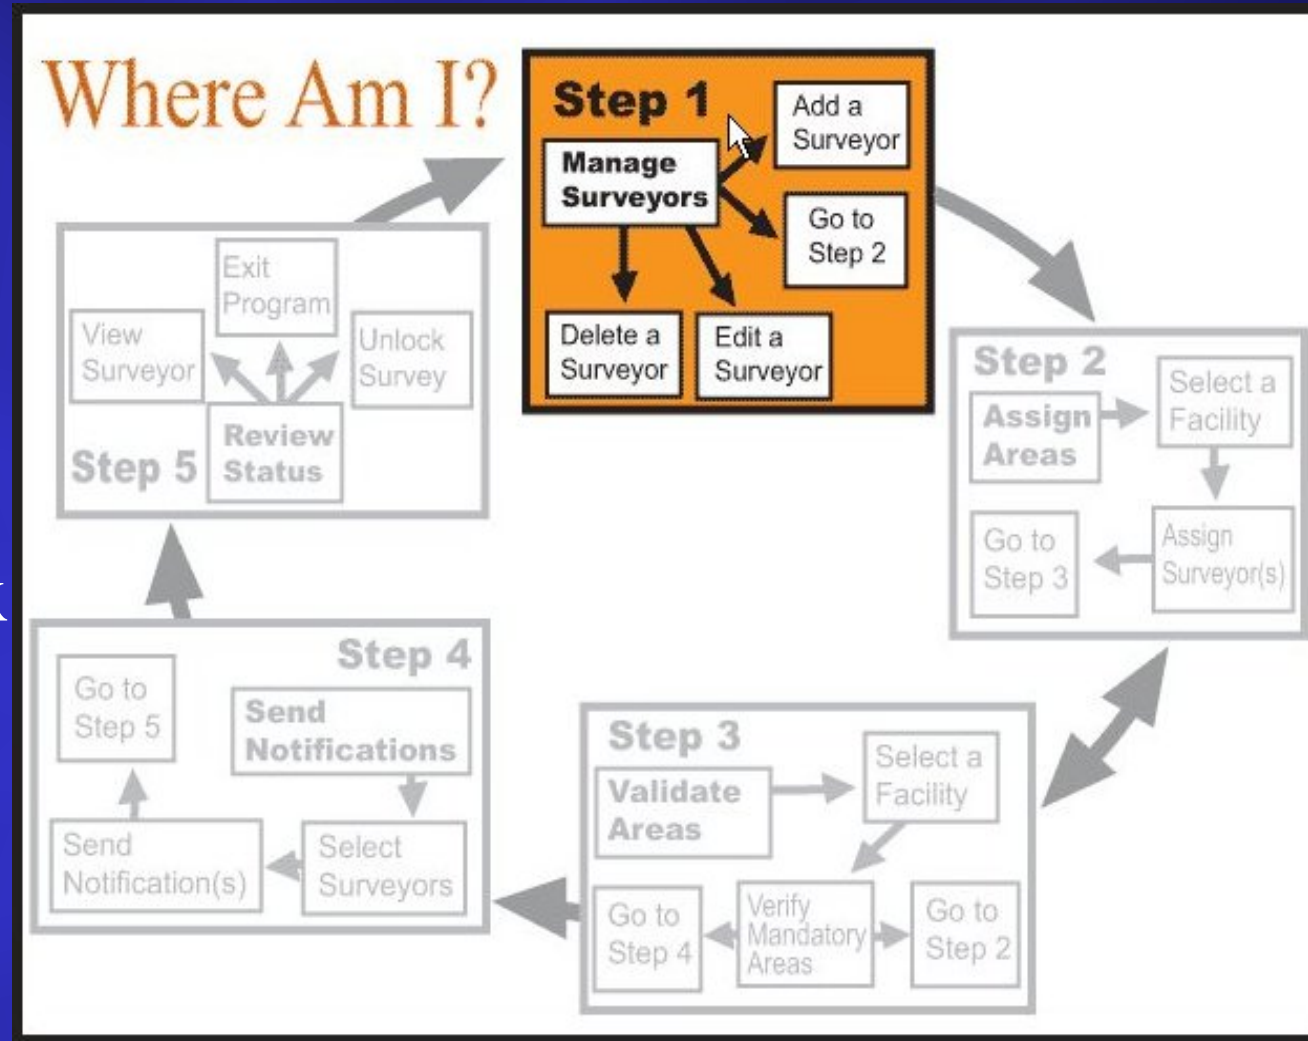

Changes (Continued)

- The list of facilities that require an inspection has been shortened to buildings with higher occupancy, multiple use and more hazard exposure.
- Portable and satellite buildings have been grouped with the main facility to minimize additional surveys.
- Prominent buildings not found on your organization's building list do not have to be surveyed.
 - As you construct new buildings and eliminate facilities, complete the building identification survey and submitted it to Risk Management for coverage purposes.

Features

- A new feature is the “Where Am I” box. If at any time you question where you are, click on this box to view a navigation diagram.

Features (continued)

Three helpful tools can be accessed on the left-hand side of each survey page:

- **FAQ** – This link directs you to frequently asked questions, a problem solving tool that will be available for both coordinators and surveyors.
- **Email Risk Management** - This link enables coordinators to contact a SIS Administrator at DRM with any questions or concerns about the survey.
- **Take a Survey** - This link allows coordinators to access a survey. You must add yourself as a surveyor if you will be doing surveys.

Controls For Risk Management

- We can add or delete coordinators.
- We can access information and reports.
- We can answer questions .
- We can give additional training on-line or upon request.

Coordinator's Role in Survey Development

- Identify and add every Surveyor for your organization.
- Select a facility and assign individual Surveyors.
- Assign areas of inspection (inspectable areas) to each Surveyor.
- Verify that all inspectable areas/buildings have been assigned.
- Send notifications to Surveyors regarding their assigned buildings and inspectable areas.

The Self Inspection Survey

The following slides are a step-by-step progression of the screens that appear on the Self Inspection Survey. As we navigate through the survey, follow along on your own computer. If at any time you are not on the same slide, please ask for assistance from one of the Risk Management staff.

DTS Department of Technology Services Utah Master Directory (UMD) Login Page

UMD Security Authentication:

Requesting Coordinators must be registered users of UMD for controlled access to Utah State Applications. If a Requesting Coordinator does not have a UMD login and password, s/he will need to click “Create new user account” on the UMD login page. Because validations of the requests are conducted via email, Requesting Coordinators must have a valid email address. Some email addresses take longer to validate through outside systems, i.e., yahoo.com, hotmail.com, etc.

A Message from Risk Management

This is a place holder for the 2008 cover letter.

Welcome WARREN GRAMES

Select one of the steps in the left Navigation.

Manage Surveyor(s): You can add, edit or delete Surveyors for your organization.

Assign Inspection Areas: You can assign or delete Inspectable Areas to a Surveyor for a specific Facility.

Validate Mandatory Inspectable Areas: You can review and edit Facilities that have not been assigned mandatory Inspectable Areas.

Send Notifications: You can notify any or all of your Surveyors to take the Survey(s)

Review Status: You can review the Survey status of all your Facilities.

Take a Survey: If you have assigned yourself as a Surveyor, click this link to take your assigned Survey(s).

Exit: Click the Exit button below to exit this program.

[Exit](#)

Confirm Notification of Surveyors

- This page gives confirmation that the notification has been sent. If more surveyors must be notified click the “Notify More” button and continue.
- When all notifications have been completed move on the Step #5.

The screenshot shows a web application interface for the Risk Management Self Inspection Facility Survey. At the top, there is a logo with a dome and a lighthouse, labeled 'RISK MANAGEMENT'. The page title is 'Risk Management Self Inspection Facility Survey' with a 'Where Am I?' link. The user role is 'Coordinator' and the current step is 'Step 4: Send Notification to Surveyor(s)'. A sidebar on the left lists 'Coordinator Steps' from 1 to 5, with '4 Send Notification(s)' highlighted. Below the steps are links for 'FAQ', 'Email Risk Management', and 'Take a Survey'. The main content area has a section 'Notifications Sent' containing a table with two columns: 'Surveyor(s)' and 'Facility(s) Assigned'. The table has one row: 'Jackson, Joe' and '1644.2 : Calvin Rampton Building'. Below this is an 'Options' section with instructions: 'The following Surveyor(s) have been notified concerning their Risk Management Facility Survey(s). **Notify More Surveyors:** Click on the "Notify More" button. **Exit:** Click the Exit button below to exit this program.' At the bottom, there are three buttons: 'Notify More', 'Go to Step 5' (with a mouse cursor pointing to it), and 'Cancel'. An 'Exit' button is also present on the right side.

1 Y

Are vehicles maintained and serviced, and are maintenance records kept on file?

All vehicles and related equipment should be serviced and maintained on a regular basis. Keep a written record of the service and maintenance that is performed, for future verification.

2 Y

Are driver licenses of all employees or volunteers verified before they are allowed to operate publicly owned vehicles or their own vehicles on agency business, and are records kept of these checks?

All drivers operating vehicles for and in behalf of covered entities must have a valid license before they are allowed to operate a vehicle.

3 Y

Are the driving records and all required endorsements for employees and volunteers who operate publicly owned vehicles or their own vehicles on agency business, checked at least annually to ensure that the individual still has a valid driver's license, and are records kept of the checks?

4 Y

Does the agency have and enforce a policy dealing with problem drivers (those convicted of DUI, at-fault accidents or reckless driving), including restricting them from operating covered entity vehicles or their own vehicles on entity business, until they have completed a Risk Management approved driver safety program?

5 N

Have employees successfully passed a Risk Management approved driver safety course, prior to operating an entity owned vehicle or their own vehicles on agency business?

Those drivers for whom driving is an essential function of the job must complete the course each year. Everyone else must complete the course every three years.

6 Incomplete

Are all traffic accidents reported immediately to the Agency Risk Management Coordinator or other designated individuals?

Timeliness is of the essence in these matters.

Done Unknown Zone

Anticipated Changes for Next Year

- Buildings could be deleted from the survey list and other buildings added.
- Higher Education, School Districts and State Agencies will be divided with specific questions and specific inspectable areas for each respective group.
- There will be informational pop-up boxes to speed up the assignment process.
- Facilities will be pre-populated with Surveyor information.
- Changes or suggestions that are submitted this year will be considered to make the survey more user friendly.

Thank You Again For Your Participation In The 2008 Self Inspection Survey Program

All of the information you will submit will be kept in strict confidence by Risk Management. The data will be used to identify trends, generate and develop more appropriate training, and to research better methods process and procedures for safety management within all state agencies, school districts and charter schools.
